Omnisearch and note hyperlinks

Search is omnipresent. Tap the search field in the header, or press ⌘K, and a full-screen search opens. It looks across your notes, Bible passages, and reading plans at once, and results are grouped by type.

Search is fuzzy, so it tolerates typos and partial words. Recent searches are remembered and shown when the field is empty.

Notes and Bible

Type a book name, like "John", and matching passages appear alongside your notes.

Notes and Bible

Type a book name, like "John", and matching passages appear alongside your notes.

Notes can also be linked to each other. Type `[[` in the editor and a picker appears. Choose a note, and a navigable link is inserted. Backlinks are tracked automatically.
